

VOLUNTARY, PRECAUTIONARY BOIL ADVISORY

Water System Name: Eufaula PWA

Public Water Supply ID: OK1020514

Date: 8/29/21 11:30AM

Due to water line break and experienced low or no water pressure in the water system and the potential for contamination as a result, the drinking water supplied by the City of Eufaula may be unsafe for human consumption. A voluntary, precautionary boil advisory is issued for customers who experienced service interruptions this weekend.

It is advised that the consumers of this water system bring the water to a full, rolling boil for at least one minute before drinking, consumption, food preparation, baby formula preparation, dish washing, tooth brushing, ice making, wound care, and bathing infants who may ingest bath water. Alternatively, bottled water or another acceptable water source may be used.

Once water service is returned, customers must flush the water for five minutes or until fresh, clear water comes out of tap. This advisory will remain in effect for 72 hours.

Questions concerning this situation should be addressed to Willie Eastteam, Public Works Director at 918-617-2595.

Address of the PWS: P.O. Box 684, Eufaula, OK 74432.

County: McIntosh
