

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Eufaula PWA Did Not Meet Monitoring Requirements

Our water system violated drinking water requirements pertaining to the contaminant(s) of concern listed below. Although none of these violations are considered emergencies, as our customers, you have a right to know what happened and what we are doing, or have done, to correct these violations. Customers are not at risk and there is no reason to suspect any potential adverse health effects. Alternative water supplies are not needed.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During the following monitoring periods, we did not monitor or test for the following contaminants, and therefore cannot be sure of the quality of your drinking water during that time:

<u>Type of Sample(s)</u>	<u>Monitoring Period(s)</u>
NITRATE-NITRITE	1/1/2022 To 12/31/2022
VOLATILE ORGANIC CHEMICALS	1/1/2020 To 12/31/2022

What should I do? No action required

What happened? What is being done? VOC sampling that is required once every three years and was not collected. Nitrate-Nitrite sampling that is required annually was not collected. Training to follow established sample schedule.

We anticipate resolving the problem by this date: April 4, 2023

For more information, please contact Jeb Jones at 918-689-2534
or 17 Hospital Rd. Eufaula, Oklahoma 74432.
